Pune, Maharashtra

Summary

Throughout my 5+ years career as a full stack software developer, I have focused on developing scalable and well-documented code. I enjoy working collaboratively but can also run with projects independently. Excited about the prospect of joining a product-driven company.

Experience

Software Developer

Amdocs • Pune, Maharashtra

11/2021 - Present

1. Worked on building and enhancing User identity, Account and subscription management product handling around 20+ million users.
2. Worked closely with the product team to identify and fix critical bugs, adding new functionalities and enhance user journey. Wrote clean, scalable and well-documented code in ReactJS and Spring boot to achieve functional requirements.
3. Worked closely with DevOps team in activities like tech upgrade, creating and enhancing Jenkins jobs, build deployments etc.

Assistant Systems Engineer

Tata Consultancy Services • Trivandrum, Kerala

04/2019 - 10/2021

1. Worked with business users and operations teams to understand business needs and address production questions.
2. Analysed requirements and designed, developed and implemented Document Management System and Customer Communication Management System for a banking domain with help of Newgen products Omnidocs and OmniOMS.
3. Wrote a code in Java to build custom wrapper REST APIs which can be consumed by other platforms. Built a utility for batch processing using Java which reads xml files and spools data into Oracle DB.

Angular Developer

TMK Computers • Pune, Maharashtra

05/2018 - 03/2019

1. Worked closely with clients to establish problem specifications and system designs.
 2. Built database and table structures following MySQL architecture methodology for web applications.
 3. Built web services to perform CRUD operations using Laravel framework.
 4. Wrote and tested code in Angular 6 to develop responsive frontend.
